

STEP 1

The three R's:
Remember Red Right

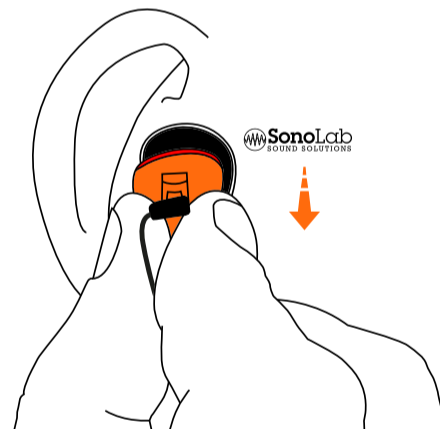

STEP 2

Apply some
lubricant onto
the earplugs,
at least for the
first few uses.

STEP 3

Hold your plug so that
the SonoLab wording
faces down.

STEP 4

Push the plug into your
ear canal and gently
rotate it 90° backwards
to lock it into position.

The SonoLab wording
should now be facing
forward.

To remove the earplugs,
reverse the procedure.
